

ASHCOR HIGH CAPACITY ENCLOSED COMBUSTORS

ASHCOR's high capacity enclosed combustors vary in their firing capacity, but all are equipped with ASHCOR flame arresters and Profire burner management controls that improve site safety and add a sense of reliability to the constant risk in the oil and gas industry.

Additionally, ASHCOR's high capacity enclosed combustors are made of a stainless steel or painted carbon steel body and designed to withstand heavy wind, harsh oil and gas environments and other stringent conditions.

All ASHCOR high capacity enclosed combustors can be upgraded to include solar panel functionality and Class 1/Div 2 rated Profire burner management system.

ASHCOR

EQUIPPED WITH

ASHCOR FLAME ARRESTERS

PROFIRE BURNER MANAGEMENT SYSTEM

ASHCOR 500

32 MMBTU/hr

ASHCOR 800

48 MMBTU/hr

ASHCOR 1000

63 MMBTU/hr

ASHCOR 1500

87 MMBTU/hr

SYSTEM FEATURES SPECS

Gas train controls and monitors gas flow to the burners

Continuous pilot and flame presence monitoring

Pressure based system operation

Refractory lined

Combustion Temperature Air Control

ASHCOR flame arresters
